# 公開課觀課任務與觀察記錄

**Lesson Observation Sheet　S1 Integrated Science　1CL**　　觀察者 Observer: _____

**主題 Topic: Factors Affecting the Rate of Dissolving**

學習成果：以數據支持結論；解釋誤差影響並提出對應改進。

Goals: Use data to support a conclusion; Explain the effect of a limitation and justify a matching improvement.

## 觀察焦點 Observation focus

A　AI 對話與推理 AI dialogue and reasoning

B　表達思考歷程 Explanation of thinking

C　公平測試及協作 Fair testing and collaboration

| 階段 Stage | 觀察提示 What to look for | 具體表現 Evidence |
|---|---|---|
| 0–6 min<br>Pre-lab & Design | 學生能否說明改變、量度及控制的變量？<br>Can students explain their variables and controls? | |
| 6–20 min<br>Hands-on & Data Input | 操作與記錄如何影響比較的公平程度？<br>How do procedures and records support a fair comparison? | |
| 20–35 min<br>Analysis & Agent Water | 追問後有沒有補充數據或解釋影響？<br>Does a follow-up lead to evidence or an explanation of effects? | |
| 35–45 min<br>Presentation & Synthesis | 改進是否針對限制？同儕怎樣回應理由？<br>Do improvements match limitations? How do peers respond? | |

請記錄原話、數值或作品內容，把觀察與解讀分開。

Record exact words, values or work. Separate observations from interpretation.

# 思考的改變與教學回饋

Changes in thinking and teaching feedback

| 思考證據 Thinking evidence | 記錄 Notes |
|---|---|
| 學生最初的想法<br>Initial student idea | |
| 引發再思考的追問<br>Question that prompted further thinking | |
| 修訂後的說法及其理由<br>Revised explanation and reason | |
| 追問或支援來自誰<br>Source of the question or support | AI / 教師 Teacher / 同儕 Peers / 鷹架 Scaffold |

## 小組議課準備 Group report

一項證據 One example of evidence

---

我們的解讀及仍需了解之處 Interpretation and remaining questions

---

一項具體教學建議及理由 One practical teaching suggestion and why

---

## 個人回饋 Individual feedback

最值得保留的安排 One feature to keep

---

最值得調整的設計 One design change to develop

---

以可見證據討論 AI、教師、同儕及鷹架的作用。

Use observable evidence when discussing the roles of AI, teacher, peers and scaffolds.
